

# SOFEMA WILL BE PRESENT AT THE 4TH EDITION OF SOFINS

## News release

**Levallois-Perret - February 13, 2019** - SOFEMA is specialised in the international trade of new or second-hand civilian and military equipment, and in the renovation of materials not used anymore by the French or foreign armies.

The company will attend SOFINS, which will be held from April 2 to 4 at Camp de Souge in Gironde.

This exhibition dedicated to the Special Forces, unique in Europe, is the meeting place for all those working on the development of security.

Delegations will be hosted on our booth A12 in the inner zone, where we will present a HADÈS20® weapon system, as well as on the outdoor park, booth #F7, where we will exhibit a VLRA vehicle equipped with the same weapon system. This system was developed under SOFEMA project management; it is a 20mm M693 (CN MIT 20 F2) gun mounted on a specifically designed carriage.

Built on any type of platform (pick-up, truck, military ship) HADÈS20® is intended to fulfil the following missions:

- Anti-personnel and anti-armoured light fire up to 2000 m,
- Protection of sensitive sites in ground-to-ground or short-range ground-to-air shooting.
